About 7-Eleven

Since 2024, 7-Eleven Australia has joined 7-Eleven international to be part of the biggest retail network across the world, represented in 20 countries with over 84,000 stores. 7-Eleven Australia's purpose is to make every day easier so Australians can live a good life.

The Role

Our Power BI Developer is responsible for ensuring that relevant insights are conveyed to the business using a suitable medium, and in a method which is clear, concise and easy to understand. You will work with all stakeholders, gathering requirements and delivering insight and reporting solutions through innovative use of analysis and information presentation. Provide expert knowledge and guidance relating to data analysis and presentation. Develop reporting, analytics and dashboard solutions that leverage the Enterprise Data Platform (EDP) to provide actionable insights into 7-Eleven's operations and other key business performance metrics.

Key Responsibilities

- Create functional and technical design documents in collaboration with 7-Eleven and Support Vendor Engineers.
- Lead or participate in functional and business requirements gathering sessions.
- Design, develop and optimise the Power BI models, measures and dimensions suited for immediate and future requirements.
- Utilise Power BI to analyse large datasets and present compelling insights in appropriate visual formats — such as infographics, maps and other multidimensional charts and dashboards.
- Support the development and ongoing execution of the enterprise data quality management strategy.
- Support 7-Eleven's Enterprise Architecture by adhering to architecture standards, patterns, policies and principles.
- Understand 7-Eleven's Information Security, Identity and Access Management and Privacy policies and ensure controls are effectively managed.
- Manage configuration, data requirements and test plans to satisfy functional unit tests, regression tests and system integration tests.

What's in Your Toolkit

- Technology or IT background.

- Extensive experience in Power BI or another market-leading visualisation tool, covering analytics and report development, data model optimisation and tool administration.
- Familiarity with agile ways of working and delivery methods.
- A can-do attitude and good communication skills.

Diversity, Inclusion & Benefits

7-Eleven is committed to creating a workplace that fosters inclusion and celebrates diversity, and is proud to be a Diversity Council Australia Inclusive Employer 2025-2026 and Gold Accredited with the Australian Workplace Equity Index. Benefits include flexible/hybrid working, up to 15 weeks paid parental leave, a paid volunteer day each year, and unlimited LinkedIn Learning access.
